MIRASYAFX
DEEP VISION INVESTMENT COMPANY

ABOUT US

Mirasys is a software development firm founded in 1996. Mirasys dived into cryptocurrency in the year 2019, marking the inauguration year of Mirasysfx. Its inception is one that is quite unique, slightly unorthodox (to say the least), and solely based on capitalizing on a gap within the financial services space. Mirasysfx has since raised over \$2.0 billion of private capital under investment management.

We invest in quality companies together with management and business owners to persevere and grow the business for long-term value creation. In principle, we can own our companies indefinitely and create liquidity for our investors through dividends and recapitalizations but may decide to sell a business when the time and circumstances are right.

Our investments are made on a deal-by-deal basis with an industry-agnostic approach in Europe. We typically take majority ownership but can also take minority positions on the right terms. We want to partner with companies where we can add value as active and engaged investors and we only invest in companies where we have a complete understanding of the business model and the risks involved.

Since our founding days, we've always had an edginess to our presence within the finance industry. Today, Mirasysfx is still owner-managed and has opened a diverse means of business that is the majority in the digital industry and energy industries. We promote from within and cast a wide net to attract and retain top international networking. As we continue to create our path as trailblazers within the finance space, we are also naturally ever-evolving as leaders that take a transparent approach to leverage high-value trust within the industry.

OUR C.E.O

Erich Kusuki is the Chief Executive Officer of MirasysFx. He is a crypto enthusiast, an analyst, and an investment expert. With his several years of experience in the investment sector, He spearheaded and founded the company MirasysFX.
